Auditory-Verbal Center, Inc.

Laying the foundation for a lifetime of listening and speaking without the need for sign language or lip reading.

We have spent over 40 years providing quality Auditory-Verbal Therapy and hearing healthcare services to children and adults who are deaf or hard of hearing. All of our Auditory-Verbal Therapists are Speech-Language Pathologists who specialize exclusively in teaching children with hearing loss to listen and speak. They are trained to develop the listening pathways in a child's brain, laying the foundation for a lifetime of listening and speaking without the need for sign language or lip reading. Our specialists provide a family-centered approach to learning to listen and speak through Auditory-Verbal Therapy. We also provide therapy in Spanish with a bilingual therapist, specifically designed to target Spanish language milestones.

DID YOU KNOW?

Approximately **3 in 1,000** babies are born with hearing loss, and more than **90%** of children with hearing loss are born to typically-hearing parents.
