**Adjusted gross income (AGI)*: *You subtract certain "above-the-line" adjustments from your gross income to get your AGI. Examples of these adjustments include contributions to a traditional IRA or student loan interest.* NOTE: Individuals with a higher income may be subject to the alternative minimum tax (AMT).

Did you know?

While the lowest tax bracket is listed as 10%, for a single person with an *adjusted gross income of up to $12,800 in 2027, the federal income tax will be effectively 0%, not 10%.** This is because the standard deduction of $16,600 for 2027 will reduce the taxable income to $0, resulting in NO federal income tax owed.
